

FOAM ADHESIVE

ADHESIVE - PART # 4711

APPLICATOR - PART # 4712

CLEANER - PART # 4713

General purpose, fast-tack 60-second foam adhesive. Provides excellent bond strength when using a variety of construction materials, including wood, metal, foam, and concrete, without degrading or deforming XPS and EPS polystyrene foams.

Foam Bond 60 is ideal for installing both indoor and outdoor architectural engineered foam shapes and trim, as well as rigid foam insulation panels on building exteriors and in crawl spaces. In many cases, installers are able to totally eliminate the use of mechanical fasteners when they use this polyurethane adhesive.

Its 60-second fast-tack technology makes this an ideal adhesive for many everyday projects both on and off the job site.
